

OLIVE 50

FEATURED BENEFITS

- ✓ Artificial Grass Superstore's new S-Blade grass products features our exclusive Luster Guard™ yarn technology. This new technology produces an extremely low luster and more natural looking blade while still maintaining complete ultra violet stability and performance.
- ✓ In addition to using special, low luster resins, the S-Blade profile is extruded with a very precise ribbed texture on the surface of the blade. This unique and exclusive texture reduces light from reflecting off the surface achieving a non shiny appearance. Innovation like this helps achieve a very natural look comparable to real grass.
- ✓ S-Blade by Artificial Grass Superstore is a high performance yarn. The S-Blade construction has a consistent thickness throughout the filaments. This eliminates any "thick to thin" areas that tend to cause weak spots triggering the yarn to split or tear. The S-Blade profile provides an extremely resilient fiber system while still offering a nice feel to the touch.
- ✓ In addition to all the great features and benefits of the S-Blade by Smart Turf, it is all 100% Made in the U.S.A. Every component of Smart Turf's S-Blade product : all raw materials, tufting and coating are manufactured and processed in the U.S.A.
