

OLIVE ELITE

FEATURED BENEFITS

- ✓ *Blends together two unique colors replicating the look of real grass.*
- ✓ *Uses "C" shaped profile blade with support spline which helps reduce the light reflection off the blade as well as provide a strong rigid platform that has an increased performance against matting. The curve and spline work together to create a very resilient blade that is built to look great year after year.*
- ✓ *Uses low luster polyethylene resins that incorporate all the UV inhibitors of other higher gloss fibers currently in the market place. These inhibitors offer uncompromised resistance to UV exposure.*
- ✓ *As a result of the high bulk thatch yarn, turf will stand straight up and bounce back when compressed.*
- ✓ *Drainage rate: > 30 inches per hour*
